The Mitrokhin Revelations

The Mitrokhin Revelations

Two chapters of The Mitrokhin Archive II, the “Mitrokhin Archive II” by John LeCarre were published in the early 1990s. The book contained a series of documents, including classified files, that provided a detailed account of the activities of the British intelligence service MI6 during the Cold War. The book was written in collaboration with Andrew and Vasili Mitrokhin, who had worked at MI6 before defectoring to the USSR and later to England. The book was highly controversial and was the subject of much debate, as it contained classified information that could potentially compromise the security of both countries.

The book was the result of a highly unusual intelligence operation. The Mitrokhin Archive was a code name for a secret mission, codenamed Neverova by the British Secret Intelligence Service (SIS). The mission was initiated by the SIS in the late 1960s, and it involved the recruitment of Vasili Mitrokhin, a Russian intelligence officer, to work as a double agent for MI6. Mitrokhin was tasked with gathering information about the Soviet intelligence services, particularly the KGB, and was sent to the USSR to work for the Mitrokhin Archive.

Mitrokhin was successful in his mission, and he gathered a wealth of information that was later compiled into a series of documents, which were eventually published as The Mitrokhin Archive. The book was a revelation for many readers, as it contained previously unknown details about the activities of the Soviet intelligence services during the Cold War.

The book was highly praised for its detail and accuracy, and it was awarded the Orwell Prize for Political Writing in 1993. It was also a bestseller, and it has since become a classic in the field of intelligence history.

The book has been criti...
